Seeking clinical research volunteers

We are seeking people living with amyotrophic lateral sclerosis (ALS) who would like to be involved in a clinical trial. The MetFlex clinical trial is an open-label trial that is investigating the safety and tolerability of trimetazidine as a treatment for ALS.

We are looking for individuals who:

- Are aged between 18 and 75 years
- Have an ALS diagnosis
- Are able to commit to participating over a 20-week period

We have some funding to support travel expenses associated with involvement in the trial. If you would like more information, or are interested in being involved, please contact A/Prof Shyuan Ngo on s.ngo@uq.edu.au

2 pills per day
over 12 weeks

5 face-to-face in
clinic visits

2 phone
consultations
